

2.11. Total carbon footprint (CO2 emission in the last 12 months, in metric tons)
 Please provide the total carbon footprint of your university. Please exclude carbon
 Evidence is required

Appendix 3

Calculation of Carbon Footprint Per Year

The Carbon footprint calculation can be conducted based on the stage of calculation

a. Electricity usage per year (EC 2.7)		4570
The CO ₂ emission from electricity		
2.6. Electricity usage per year (in kilowatt hour)	5,439,960.00	
b. Transportation per year (Shuttle) (TR 5.6)		0
	0	0
	0	0
c. Transportation per year (Car) (TR 5.2)		0.00
	0	0
	0	0
d. Transportation per year (Motorcycle) (TR 5.3)		0.00
	0	-
	0	0
e. Total emission per year		4570
